Intra Chickpaper

Did you know Intra Chickpaper stimulates feeding and drinking within an hour?

INTRA CHICKPAPER: THE HIGHWAY TO FEED AND WATER

The arrival of day-old chicks on the farm is a critical period at which husbandry practices can impact the chick's first week of development. The laying of Intra Chickpaper guides chicks to feed and water sources to stimulate immediate feeding and drinking. This prevents the use of the residual yolk as an energy sources, which can instead be used for critical intestinal and immune development.

6 REASONS TO CHOOSE INTRA CHICKPAPER?

- World's number 1 Chickpaper
- Hygienically packed to prevent external contamination
- 100% bio-degradable preventing the need for removal therefore reducing stress
